Governor Leito, Lt. Governor Henriquez Inaugurate HDS Complex

In a special ceremony on August 20, 1971, Lago's Fls. 175,000,000 Hydrodesulfurization Complex was officially inaugurated. The inaugural act took place at 5 p.m. at the site of the new complex where the Governor of the Netherlands Antilles, Drs. B. M. Leito, cut a ribbon and unveiled a commemoration plaque. Following this, Lt. Governor of Aruba O. S. Henriquez symbolically started the plant by turning a switch. Assisting in the inauguration ceremonies was Vallita Maduro, Miss Aruba 1971.

The special program for guests started in the Administration Building where Lago's President Roy L. Trusty welcomed the guests and commented on the significance of the new plant.

Said he: "The HDS complex represents the time and talent of many people from Aruba and from around the world... More important than the hardware, the project represents an achievement that was made possible by excellent cooperation between industry and government."

In his speech, Mr. Trusty gave special recognition to Lago employees: "The startup of our new units represents one of the most significant accomplishments in Lago's history. Most of the credit for one of the most successful and safest large project startups in the history of Standard Oil Company of New Jersey must go to our Lago employees who accepted full responsibility for bringing this complex project on stream. In addition to being new technology, these facilities were also started up under full computer control

— as far as we know, this is a first for the petroleum industry. From observing this startup, our advisors and shareholders feel our Lago employees are second to none in the world in their ability to operate and maintain complex modern petroleum processing equipment. We are particularly proud of this accomplishment."

The inaugural address was subsequently delivered by Lt. Governor Henriquez, who stressed the importance of the new plant for the economy of Aruba: Said Mr. Henriquez: "The investment involved demonstrates very clearly Lago's confidence in its people and the future of Aruba. Considering the large impact that Lago's well-being has on the economy of this island, we can safely say that Lago's progress is Aruba's progress and also the progress of the Netherlands Antilles."

He further stated: "We should be very pleased today, because thanks to joined efforts of government, private enterprise and labor, this important project was

Governor Leito performs the inauguration act at HDS site, assisted by Vallita Maduro, Miss Aruba 1971.

not only possible, but also justified. We can proudly state that we have proven again in the Antilles that we can create and maintain the right climate for the necessary economic growth, at the same time attending to our social needs."

Mr. Henriquez continued saying: "The HDS Project is also an outstanding example of what

Standard Oil of New Jersey is doing about air pollution through its affiliate Lago in Aruba... The Government and the people of Aruba sincerely appreciate the progressive attitude of Lago and its stockholders and offer their fullest cooperation also for the future."

After a bus tour of the HDS complex and refinery, the guests were taken to the HDS plant site to witness the inauguration ceremony.

Before unveiling the plaque, Governor Leito congratulated Lago and the people of Aruba with this significant project. Said the Governor: "The new facilities constitute a substantial contribution to the industrial expansion of this country and, therefore, also to its general development... In this, as in many other instances Lago, as a subsidiary of the large Esso concern, has set a fine example of modern thinking and policy-

President Trusty welcomes Governor Leito at the Administration Building where the inauguration program started.

Gobernador Leito y Gezaghebber Henriquez Ta Inaugura Planta Desulfurador

Den un ceremonia special Augustus 20, Lago su Complex di Desulfurizacion di Fls. 175,000,000 a ser oficialmente inaugura. E acto di inauguracion ta tuma lugar pa 5 p.m. na planta HDS unda Gobernador di Antillas Hulandes, Drs. B. M. Leito, a corta un cinta y a desvela un placa. Despues di esaki, Gezaghebber O. S. Henriquez simbolicamente a start e planta door di draai un switch. Asistiendo den e ceremonia inaugural tabata Vallita Maduro, Miss Aruba 1971.

E programa special pa huespedes a cuminza den Administration Building unda President di Lago Roy L. Trusty a yama huespedes bonbin y a comenta ariba importancia di e planta nobo.

El a biza: "E Complex di HDS ta representa e tempo y talento di hopi hende di Aruba y for di rond mundo.... Pero mas importante cu e material, ■ proyクト ta representa un exito cu ■ ser haci posible door di excelente cooperacion entre industria y gobierno."

Den su discurso, Sr. Trusty ■ duna reconocimiento special na empleadonan di Lago: "E startmento di e unidadnan nobo ta representa uno di ■ prestacionnan mas significante den historia di Lago. Mayoria di e credito pa uno di ■ startmentonan mas exitoso y cu mas seguridad den historia di Standard Oil Company di New Jersey mester bai pa nos empleadonan di Lago kende a acepta completo responsabilidad pa trece e proyクト complicá aki na operacion. Ademas di ta tecnologia nobo, e facilidadnan aki tambe a ser

gestart cu control completo di computador — cual, te asina leuw nos sabi, ta esun di promer den industria petrolero. Observando ■ startmento aki, nos conseheronan y accionistanan ta haya cu nos empleadonan por compara cu tur otro den mundo den nan abilidad pa opera y mantene equiponan moderno pa proceso di petroleo. Nos ta particularmente orguyoso di e prestacion aki."

E discurso inaugural despues ■ sigui door di Gezaghebber Henriquez, kende a acentua ■ importancia di ■ planta nobo pa economia di Aruba. El a biza: "E inversion envolvi ta demonstra masha cla Lago su confianza den su hendenan y futuro di Aruba. Considerando ■ impacto grandi cu Lago su bienestar tin ariba economia di e isla, nos por biza cu Lago su progreso ta Aruba su progreso y tambe progreso di Antillas Hulandes."

Ademas el a remarca: "Nos mester ta masha contento awe, pasobra gracias na esfuerzonan combiná di governo, empresa privá y obrerismo, ■ proyクト importante aki no solamente tabata posible, pero hustificá. Nos por biza cu orguyo cu nos a proba atrobe den Antillas cu nos por crea y mantene e clima apropiado pa desaroyo economico necesario, na mes tempo percurando pa nos necesidadnan social."

Sr. Henriquez ■ continua bisando: "E Proyecto HDS ta tambe un ehempel sobresaliente di loque Standard Oil di New Jersey ta haci tocante polucion di aire mediante su afiliado Lago na Aruba.. Gobierno y pue-

blo di Aruba sinceramente ta aprecia ■ actitud progresivo di Lago y su accionistas y ta ofrece nan completo cooperacion tambe pa futuro."

Despues di un tour cu bus na e Complex di HDS y refineria, e huespedes ■ ser hiba na e sitio di Planta HDS pa presencia e ceremonia inaugural.

Promer di ■ desvela e placa, Gobernador Leito a felicita Lago y pueblo di Aruba cu e proyクト significante aki. E Gobernador a biza: "E facilidadnan nobo ta constitui un contribucion substancial na expansion industrial di nos pais y pesey tambe na su desaroyo general.... Den e caso aki, mescos cu den hopi otro caso, Lago como un subsidiario di e empresa grandi ESSO, a duna un ehempel sublime di pensamiento moderno y politica di captannan di industria di awenda, kende nan vista ta forma un base solidio pa mejoracion-

nan social y economico den e comunidad unda nan ta opera."

Gobernador Leito a continua bisando: "Expansion y modernizacion di un compania tambe ta impone demandas mas alto ariba su empleadonan pa asegura stabillad. Nan mester ta interesa y sinti berdaderamente envolvi den tur loque ta tuma lugar den e compania, munstrandno nan interes, por ehemper, door di sigui estudionan complementario, sigui specializacion of cursonan di entrenamiento, of door di participa den actividadnan social y cultural auspicia pa compania."

Despues di e ceremonia, e huespedes a atende un recepcion na Esso Club. Aki un set di souvenir a ser parti, conteniendo libretas di e complex nobo y di refineria, un post kaart y envelop special, ambos cu un fotografia di color di e planta HDS.

Tambe e huespedes a ser ofreci un glas di souvenir, mescos cu esun cu empleadonan ■ recibi recientemente.

Huespedes na ■ inauguracion tabata Ministrionan di Antillas, deputadonan di Aruba, Miembrian di Staten y Eilandsraad, presidentes di IOWUA y General Workers Union, consulnan, representantes di Camara di Comercio y di Asociacion di Comercio y Industria y miembrian di prensa, radio y television. Tambe presente tabata Sr. R. N. Dolph, president di Creole Petroleum Corporation di Venezuela, y Sr. J. M. Ballenger, gerente di Departamento di Refinacion di Creole.

Guests in lobby of Administration Building (at left). ■ right are (l to r) President R. L. Trusty, Vallita Maduro (Miss Aruba 1971) and Vice President LeRoy Johnston ■ Esso Club reception.

R. Astbury Named Superintendent Of Newly Combined MCS Division

Effective August 6, the Technical Department - MCS Division and Comptroller's Department - Systems & Data Processing Section merged into a new Mathematics Computers and Systems Division (MCS) in Technical. This division is now under direction of F. Ralph Astbury who was recently promoted to division superintendent.

F. R. Astbury

The sections in the newly combined division and their supervisors are as follows: Systems & Data Processing, C. A. McKinzie; Control Systems, R. Farro; HDS Project, B. L. Nelson, and Operations Analysis & Planning, R. W. Kendrick.

A BS graduate in chemistry from the University of British

Columbia, Vancouver, Canada, Ralph transferred from Imperial Oil Canada, Ioco Refinery, to Lago in 1963. His first assignment was as a chemist in Technical - Laboratories, Development Section. The following year, he advanced to senior chemist. Three years later, Ralph was promoted to supervising chemist. Subsequently, he went on a special assignment to work on the development of the Oil Movements Control System. After the formation of the MCS Division in the Technical Department, Ralph headed the Control Systems Section.

In July, 1970 Ralph transferred again, this time to Comptroller's - Systems & Data Processing Section as section head, the position he held prior to his recent promotion.

At Lago, Ralph took courses in Effective Management, ODL, PAL Programming Language, Kepner-Tregoe and Systems Design & Analysis. He also followed a Data Processing Management course in Atlanta, Ga., Process Economics in Lima, Peru, and IBM D.O.S. Control in

Everardo Croes Ta Asumi Puesto Di Mechanical Supervisor Aug. 1

Efectivo 1 di Augustus 1971, Everardo Croes a haya promocion como Mechanical Supervisor den division di Mantencion y Construcion di Departamento Mechanical. Cu e promocion aki Everardo a drenta den grupo di gerencia.

Everardo a bin traha na Lago na 1952 como estudiante di Lago su school vocational. Despues di a gradua, el a traha como ayudante pipefitter 'B' den seccion di tuberia di Mechanical, caminda el a promove pa pipefitter 'A' na 1963. E titulo aki a worde cambiá pa metal tradesman 'A' na 1967.

Na varios ocasion Everardo a actua den posicion di supervisor di distrito den zona di movimento di zeta, y den zona di refinacion. Promer cu su reciente promocion, a tabata traha como supervisor interino Mechanical desde 1967. Na 1970 el a worde encargá cu trabao den Mechanical-HDS.

Everardo a tuma curso di Gerencia Eficaz y tambe curso di refraccion duná door di A. P. Green.

Den su tempu liber e ta gusta scucha musica stereo of waak wega di futbol. E ta casá, y su

Everardo Croes Assumes Position Of Mechanical Supervisor Aug. 1

Effective August 1, 1971, Everardo Croes was promoted to Mechanical Supervisor in the Mechanical-Maintenance & Construction Division. With this promotion, Everardo has attained management status.

E. Croes

Everardo joined Lago as a vocational student in 1952. After graduation, he worked as a pipefitter helper "B" in the

Mechanical-Pipe Section where he advanced to pipefitter "A" in 1963. This title was changed to metal tradesman "A" in 1967.

On several occasions, Everardo acted in the position of area supervisor in the Oil Movements Zone and in the Refining Zone. Before his recent promotion he had been acting mechanical supervisor since 1967. He was assigned to Mechanical-HDS in 1970.

Everardo has taken the Effective Management course and also the A.P. Green Refractory course.

In his spare time, he enjoys listening to stereo music or watching football games.

Married, he and his wife Benita, a Lago Nurse's Aide, have two children, Milton (4), and Karyn (3 weeks).

esposa Benita ta traha como asistente enfermera na Lago.

R. Astbury Nombra Superintendente Di MCS Division Recien Combinada

Cuminzando 9 di Augustus, Division MCS di Departamento Technical y Seccion di Systems & Data Processing di Comptroller's ■ worde combiná den un division nobo jamá Mathematics Computers & Systems (MCS) den Departamento Technical. E division aki ta bao direccioń di F. Ralph Astbury kende algun dia pasá ■ recibi promocion como superintendente di division.

E secciónnan cu ta cai bao di e division nobo combiná y nan supervisorian ta: Systems & Data Processing, C. A. McKinzie; Control Systems, R. Farro; HDS Project, B. I. Nelson, y Operations Analysis & Planning, R. W. Kendrick.

Ralph a gradua como bachiller di química for di Universidad di British Columbia, Vancouver, Canada, y na 1963 el ■ traslada pa Lago for di Imperial Oil Canada. Su promer encargo tabata como químico den sección di desaroyo den laboratorio di Departamento Technical. E anja siguiente el ■ progresá pa senior chemist. Tres anja despues Ralph a bira químico

supervisor. Despues el ■ recibi encargo especial di trabao, para riba desaroyo di sistema di control pa movemento di zeta. Despues di formacion di division MCS den Departamento Technical, Ralph a bira hefe di sección di sistema di control.

Na Juli 1970 Ralph ■ traslada trobe, e bisha aki pa Comptroller's-Systems & Data Processing como hefe di sección, e puesto cu e tabata ocupa promer cu su promocion.

Na Lago Ralph ■ tuma varios curso. Tambe el ■ tuma un curso di gerencia pa Data Processing na Atlanta, Georgia, Economia di Proceso na Lima, Perú, y Control D.O.S. di International Business Machines na Kingston, Jamaica.

Ora e ta liber di trabao e ta gusta hunga tenis, bridge y bai landa. E ta miembro di coro di Seroe Colorado y di Vivons en Chantant. Tambe ■ ta tesorero di Kerki di Comunidad na Seroe Colorado. E y su esposa Colleen tin dos yiu, Kathleen (6) y Randall (5).

Spanish Lagoon Marine Water Sport Center Opened in Buccaneer Style

History went back to 1700 on Saturday, August 14, 1971, when the second Dutch Marine Sport Center was officially opened at Spanish Lagoon. The opening was performed in a very original manner. The center itself is also original in two ways. It is built in fort style and floats on a barge, 100 ft. long, 40 ft. wide.

At 10:30 a.m. the Commander of the Dutch Marine Barracks, Lt. Col. T. A. M. van der Vaart, welcomed the guests and related the history of the Sport Center. The first officer, Major of the Marines W. Doorman, and Quartermaster J. A. van Spaandonck were a few of the spark-plugs behind the project, assisted by other officers, petty officers and several marines. The Commander pointed out that this sport center is closer to the Savaneta Camp and is located

at a more sheltered area. The civil personnel who worked on this project included P. A. Dirksz and F. S. Tromp.

Following his speech, the Commander asked those present to turn to the fort to witness the official opening. A battle scene that had taken place many times in the 17th century in the Caribbean was re-enacted. A schooner with a pirate flag atop was approaching, which alerted the gun crew of three ancient guns installed at the fort. When the ship came within firing range, each gun was fired, with each "shot" falling closer to the ship. The pirates soon hoisted the white flag atop and sailed to the fort to surrender, thus opening the new water sport center for the Dutch marines.

In addition to club facilities and a spring-board, there is also an airconditioned room below deck with bunk beds for four.

As a souvenir, a commemoration plaque and a ship bell from the 2nd World War were presented to Commander van der Vaart. Other recognition plaques went to Quartermaster van Spaandonck, and Mike Hagedoorn and Ernest Kervel for their assistance.

The official part ended when the bugler sounded "Abandon Ship". A special cold treat was awaiting Quartermaster van Spaandonck who was swung in the air by Commander and officers for a first official "splash down" into the sea at the center.

Group of 75 officers, petty officers and naval ratings of HMS "Groningen" attended a 3-day fire training program at Lago under direction of Fire Chief Peter Storey and Lt. N. Osseweijer. They are shown here combating a "loading rack" (left) and "unit fire."

Grupo di oficial, sub-oficial y tripulante di HMS "Groningen" a atende programa di entrenamiento di 3 dia na Lago bao direccio di Hefe di Bomberos Peter Storey y Lt. N. Osseweijer. Aki nan i combati candela na "loading rack" (robez) y candela na un "unit".

Centro Deportivo di Mariniers A Ser Habri na Estilo di Bucanero

Historia a move bek te na anja 1700 ariba Diasabra, Augustus 14, 1971, ora cu e di dos Centro Deportivo di Mariniernan a worde habri oficialmente na Spaans Lagoen. E habrimiento a worde haci di un manera masha original. E centro mes ta original den dos manera. E ta trahá manera un tipo di fort y a ta drief riba un lancha di 100 pia largo y 40 pia hancho.

Pa 10:30 a.m. comandante di Savaneta Kamp, Tte. Cnel. T. A. M. van der Vaart, a duna bonbini na huespednan y a conta historia di a centro deportivo aki. E oficial ehecutivo, Majoor di Marinier W. Doorman, y Kwartiermeester J. A. van Spaandonck tabata algun di e promotoran tras di e proyecto, cu asistencia di otro oficialnan, suboficialnan y varios marinier.

Despues di su discurso, e Commandant e pidi esnan presente pa mira den direccion di a fort pa presencia habrimiento oficial. Un escena di bataya cu a tuma lugar hopi bez den di 17 siglo den Caribe a worde imitá. Un balandro cu bandera di pirata tabata yegando, y esey a yama atencion di cañonerosnan na tres cañon bieu cu ta instalá na a fort. Segun cu e barcu tabata yega mas acerca, nan a tira cada un di a cañonnan y a balanan tabata cal cada vez mas cerca a barcu. Pronto a piratajan a hiza bandera blanca, y nan a drenta e fort pa entrega nan mes, y asina a cen-

tro deportivo nobo di mariniernan a keda habri oficialmente.

Fuera di facilidadnan di club y un tabla pa sambuya, tin també un cuarto airecondicioná bao di dek, cu camanan pa cuater hende.

Como recuerdo, un plaqeta di conmemoracion y un klok di barcu for di segundo guerra mundial a worde presentá na Commandant van der Vaart. Otro plaqetanan di reconocimiento a bai pa Kwartiermeester van Spaandonck, y Mike Hagedoorn y Ernst Kervel.

E parti oficial a caba ora cu tocador di trompet a duna a señal "Bandona Barcu". Un triet friu tabata sperando Kwartiermeester van Spaandonck ora cu Commandant y oficialnan a tiré den awa pa e promer baño friu den lama na e centro.

Thonus, resident engineer at Parsons' office in Aruba; and Earle A. Nirmaier, HDS startup leader (not in picture).

Nearly 7,000 Lago Employees and Family Members View HDS Complex

Nearly 7,000 Lago employees and family members got the first view of the newly completed desulfurization complex on August 14, 1971. In addition to organized tours of the new facilities, an all-day "open house" was held for the visitors at the Esso Club where refreshments and snacks were served.

Also invited to preview the new complex, which has been in operation for some time, were press, radio and TV representatives.

To commemorate the special occasion, a unique souvenir was presented to each employee. This is a glass mug with a picture of the complex imprinted in gold on one side, and the Lago oval in original colors on the opposite side.

As a surprise for the visiting employees, ten gift baskets were raffled. The winners, announced the following Monday in the Company's "Diario", were Rudolf Ranes, Rudolfo E. Trimon, Manuel M. Curiel, Kenneth Johnston, Wilhelm Geerman, Juan Vrolijk, Agustin Maduro, Alexander H. Hoo, B. R. v/d Linden and Julio G. Croes.

What the thousands of visitors saw during their tour was an impressive array of towering steel structures and a maze of pipelines. Put together, the pipelines cover 100 miles, or five times the length of Aruba. The

whole complex can lower the sulfur content of fuel oil from 2.6% to 1% at a rate of about 100,000 barrels per day.

The HDS Project, carried out by Ralph M. Parsons Corporation ■ prime contractor, required a labor force of over 2,100 at the peak of construction. Of this total, some 1,720 were skilled and unskilled workers from Aruba. Off-island workers came from the U.S.A., Venezuela, Colombia, Canada, Holland, England, Italy, France, Germany, Spain and Portugal.

The desulfurization complex represents the largest single investment ever made in the history of the Netherlands Antilles. With this Fls. 175,000,000 investment, which has created some

From 9:30 a.m. till 5:30 p.m. ten buses making over 90 trips took thousands of guests on HDS tour followed by an "open house" at the Esso Club. The tours started here at the Administration Building. making of the captains of industry of today, whose views form a solid basis for the social and economic improvements in the business community where they operate."

Governor Leito continued saying: "Expansion and modernization of a company also make higher demands on its employees so as to ensure its stability. They should be interested and feel actually involved in all that is going on in the company, showing their attachedness, for instance, by undertaking complementary studies, attending

specialization or retraining courses, or by participating in social and cultural activities sponsored by the company management".

After the ceremony, the guests were entertained at a reception at the Esso Club. Here a special souvenir package was distributed containing booklets of the new complex and refinery, ■ special post card and envelope, both imprinted with color photographs of the HDS plant.

Also offered to the guests was a souvenir glass mug, the same as that distributed to employees recently.

Guests at the inauguration included Ministers of the Nether-

lands Antilles, aldermen of Aruba, Legislative Council members, Aruba Island Council members, presidents of the Independent Oil Workers Union of Aruba and of the General Workers Union, consuls, representatives of the Chamber of Commerce and of the Aruba Trade & Industry Association and members of the press, radio and TV. Also present were Mr. R. N. Dolph, president of Creole Petroleum Corporation of Venezuela, and Mr. J. M. Ballenger, Refining Department manager of Creole.

One of Lago's two festively decorated tugs blew whistle and sprayed fountain of water after inaugural act.
